Our Team Strengths

- Microsoft certified professionals.
- Microsoft ISV Empower Partner.
- Oracle certified professionals.
- Ninety percent staff members hold Masters degree.

Testimonials

Gearupdate.com is a cost-per-click database-driven advertising site that, from a functional standpoint, has robust, complex back-end administrative features. Having worked with a different company for nearly a year with little success I decided it was necessary to find a company with the expertise to make the site a reality. Overall, I am extremely pleased with the results and customer service TechLiberty has provided. I am happy to recommend them for even the most complex website development...."

Mr. Brian J. Vargo
Owner
Gearupdate.com

"When I encountered some problems that my very able website developer could not handle they referred me to TechLiberty and the issues were swiftly resolved. Each time I have very impressed with their recommendations and with the enhancements they have made for my site."

Mr. Fred J Eckert
Eckert Images International Inc

About Us

TechLiberty Inc., is an IT consulting and application software development firm. We offer full life-cycle custom application software programming services, Enterprise architecture and solutions, offshore software development, enhancement and sustainment. Our goal is to free our customers from their legacy environment to open environment by implementing all the latest technologies with high quality and security. Our employees are capable of providing solutions to any kind of mission critical and complex business applications. We specialize in providing complete solutions right from requirements through implementation. We are very proficient in delivering value-added products consulting, engineering, and training services.

How do we differ from others?

- Ability to take on and turn around troubled projects. Re-engineer and Re-architect legacy applications and apply enterprise wide concepts.

- A willingness to assume total project ownership from concept through design to implementation and rollout, including complete documentation, training and support. In other words, total project Life-Cycle Management (SELC).

- Fixed-priced coding and development capabilities.

- An automated testing environment that reduces testing time by a factor of four while significantly improving quality.

Our Services

TechLiberty professionals are experts in providing engineering and consulting services to our clients. Our cross-functional core competencies include: Requirements Analysis and Design Architecture, Joint Application Development /Rapid Application Development, Prototyping, Functional Design and Coding, Testing, Client/Server software development, Web Services development and Technology Integration, Transfor-mation and Migration. We use object-oriented design techniques and are experienced with Modeling, RDBMS and Graphical User Interface (GUI) tools, internet/intranet technologies, and security systems and firewalls.

TechLiberty professionals are well versed with latest versions of software languages & web designing tools. Our expertise includes programming using Oracle PL/SQL, JDeveloper, Oracle Fusion Middleware, OWSM, ASP.Net 2008, VB.Net 2008, Java, JSP, PHP, VC++, UML, XML, AJAX, DNN, IBM Rational Tools, VSS, C++, COM /DCOM / ATL / SOAP, SAS etc with the back end of MS-SQL, MS-Access and Oracle.

Past Performance

TechLiberty handled mission critical IT projects ranging from medium to high complex systems. Most of the web application clients are from small business and startup companies. TechLiberty performed many projects to larger clients such as SM Consulting, GTSI, General Dynamics, TEAM Inc, CACI and Constellation Inc. Most of our projects are in compliance with SDLC process, CMMI, Section 508, Federal Enterprise Architecture and Service Oriented Architecture (SOA) standards. The following are the list of projects performed in the past 5 years.

- **Senate Portal Project (SPP)**
  This project is for the U.S Senate which was Contracted through General Dynamics and SAI.

- **First2Gov, Global Contract Management System**
  This project is for the GTSI to enable Service Oriented Architecture with in the enterprise.

- **Sales Commission System (SCS) SmartTrack**
  This project was performed for SM Consulting Inc which was later merged with SAIC

- **RMT RE-MAP AND DATA MIGRATION (US ARMY)**
  Contracted through CACI.

- **Defense Health Systems Services (DHSS)**
  System Engineering Enterprise Architect Tier-2 level Support. Contracted through TEAM Inc.

- **External Affairs Disaster Management**
  Contracted through IBM, Constellation Inc.

- **Medical and Pharmaceutical related applications**
  Performed for Kaiser Permanente and Slate Pharma.

- Performed numerous other projects in the area of Web based applications and web services.
